

# TEKNEU®

## Workshop equipment

### AURUM

7,3kW | INDUCTION MELTING POT

Melt precious metals like gold and silver with induction heating, generating heat inside them in a fast and controlled way. Contrary to the welding torch which burns the metal surface, induction allows to heat without modifying the characteristics of the metal itself.

#### TECHNICAL FEATURES:

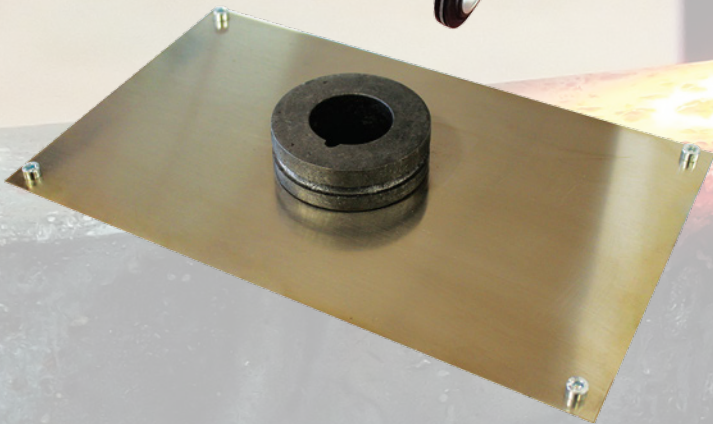

Max power: 7,3kW

Dimensions and weight: 43x42x105cm - 70Kg

Supply: 230V@50/60Hz

Supply cable length: 10m

Cooling system: liquid

### JAWS

5,4kW | COPPER STRIP WELDER

An efficient induction machine for braze-welding. Thanks to its pressure pincers it allows to weld electrical conductors, big transformers, engines and big generators.

#### TECHNICAL FEATURES:

Dimensions and weight: 43x42x105cm - 65Kg

Supply: 230V@50/60Hz

Supply cable length: 10m

Cooling system: liquid
